

## JACKSON SUPPORT RATING SYSTEM

A boot with the appropriate level of support is critical to skater performance and injury prevention. Selecting a boot that is too stiff for the skater's ability and physical characteristics can seriously impede the flexibility necessary to perform and develop skating skills. It can also result in injury as the skater is unable to properly break-in the boot. A boot that is too soft will result in a lack of support impacting performance and can lead to premature breakdown of the skates.

Jackson offers the **5000 Series** in a variety of support levels:

SUPREME 5300

SUPREME 5430 LOW CUT

SUPREME PRO 5320

SUPREME 5362

SUPREME 5462 LOW CUT
