

Matrix

ADVANCED SERIES

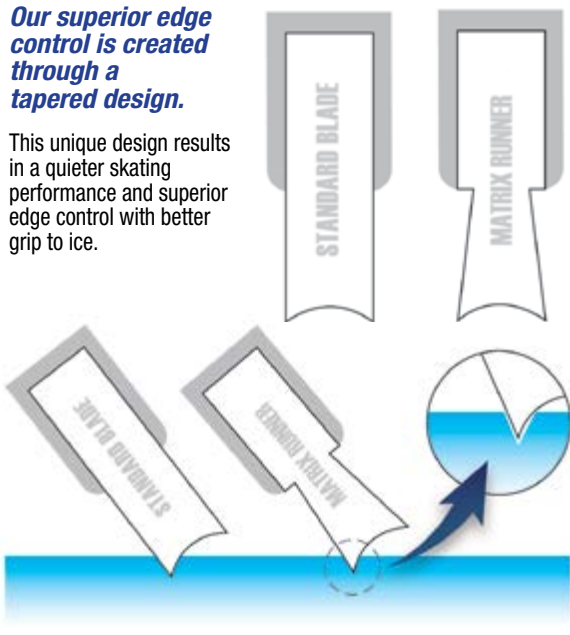

Lighter, Faster with the Superior Edge Control of Stainless Steel.

The Matrix Advanced Series blades feature an extremely strong yet lightweight **Aircraft Aluminum chassis** with **Japanese AUB Stainless Steel**. The combination of advanced materials and design creates a superior blade to the Revolution Series.

- **17% lighter than Revolution blades.** Stainless steel which is harder than the carbon steel used in the Revolution blade results in a faster blade with enhanced edge control and less frequent sharpening.

Our superior edge control is created through a tapered design.

This unique design results in a quieter skating performance and superior edge control with better grip to ice.
