

JACKSON ULTIMA SIZING CHART FOR FOOT LENGTH

Fitting your skates is important. A comfortable fitting skate will allow for an enjoyable skating experience. Here are a few tips to assist in selecting the correct size:

- Take measurements in the socks that will be used while skating.
- Stand on a sheet of paper.
- Have someone else place a mark at your longest toe and at your heel. The pen should be straight up and down to determine the proper length.
- Remove the foot and measure the distance between both marks in inches; repeat with your second foot.
- Using the longer measurement of your two feet, select the most appropriate size. Do not select a size that is smaller than the length of your longest foot.

Please note:

- Determining skate size by comparing to street shoe sizing is difficult as both are sized for different movements; skates are sized to glide with little foot movement while shoes are sized to allow for more flex when walking.
- Skates generally have a snug fit to ensure the foot does not move; this type of fit may not suit everyone.
- Children may need a little extra room for growth.
- Increased sizing may be needed to accommodate wide feet comfortably.

	Boy's Sizes	Girl's Sizes	Foot Length
TOTS	n/a	8	5 3/4"
	n/a	9	6 1/16"
